## The Judging Process

The IPTV World Awards 2008 will be judged by a panel of independent experts with experience in the IPTV sector. The initial part of the judging process will determine the 3 shortlisted entries from each category by the panel above. We will send those results to another group of judges, independently, to seek the over all winner. The shortlisted will be judged by the following process:

Each judge will then be asked to select their top three nominations in the categories they are judging and these will be scored with three points for their first choice, two points for their second choice and one point for third. In each category, the nomination that receives the most points in total, once all the judges results are accumulated, will win.

If two or more nominations receive the same number of points in a category, and this has a material impact on the outcome of the awards ( i.e. it could have an effect on who is shortlisted or who wins), the judges will be asked to cast deciding votes.
